This would provide an overall view of what is happening in the City of Oakley which would be done through mapping work orders in the city spreadsheet reports. This system is cloud based and can minimize paperwork and be used for a model of forecasting of Capital Improvements. They also mentioned that it could be used to streamline information providing a Cycle of Success through: Assess...Prioritize...Plan...Execute...and Maintain.

They thanked the council for their time and left the meeting at approximately 12:30 PM.
